

# HOW TO WIN AT IMPLEMENTING SAFETY TECHNOLOGY

With new safety technologies coming onto market at an increasing pace, it's tempting to dive fast into innovation. However, matching the solution to your organizational need is crucial to success.

# 50%

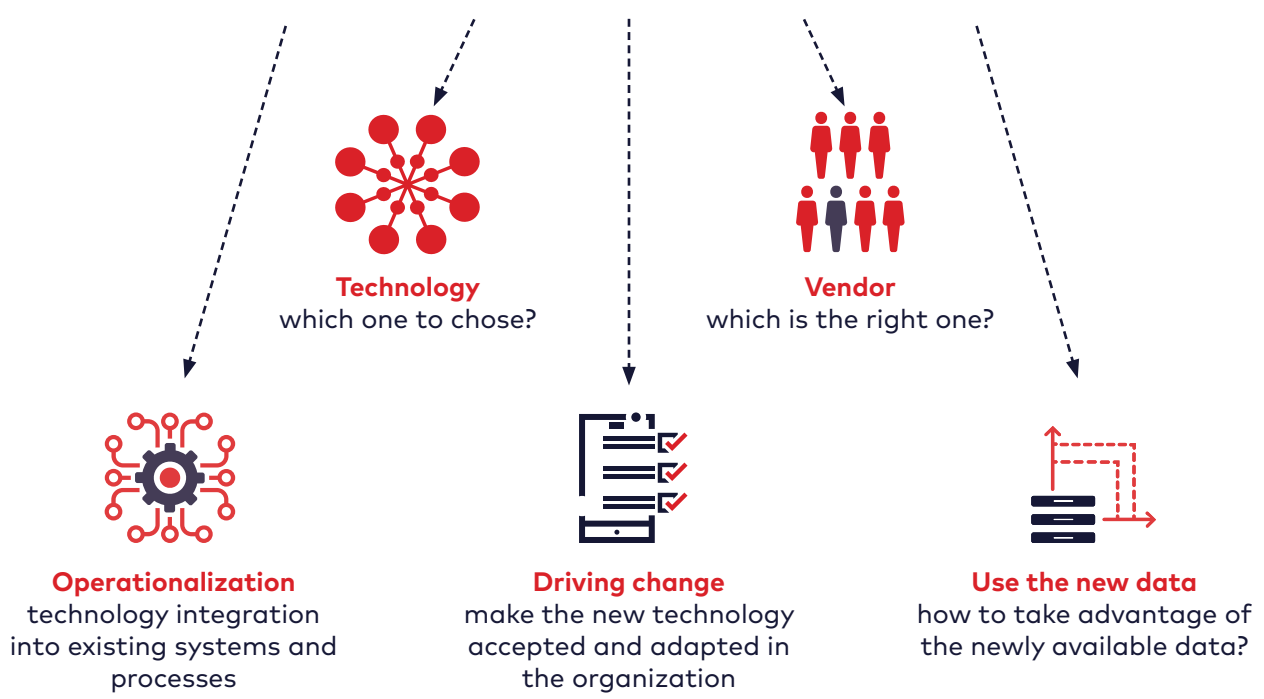

Less than 50% of safety technology implementation projects are successful.

# 12

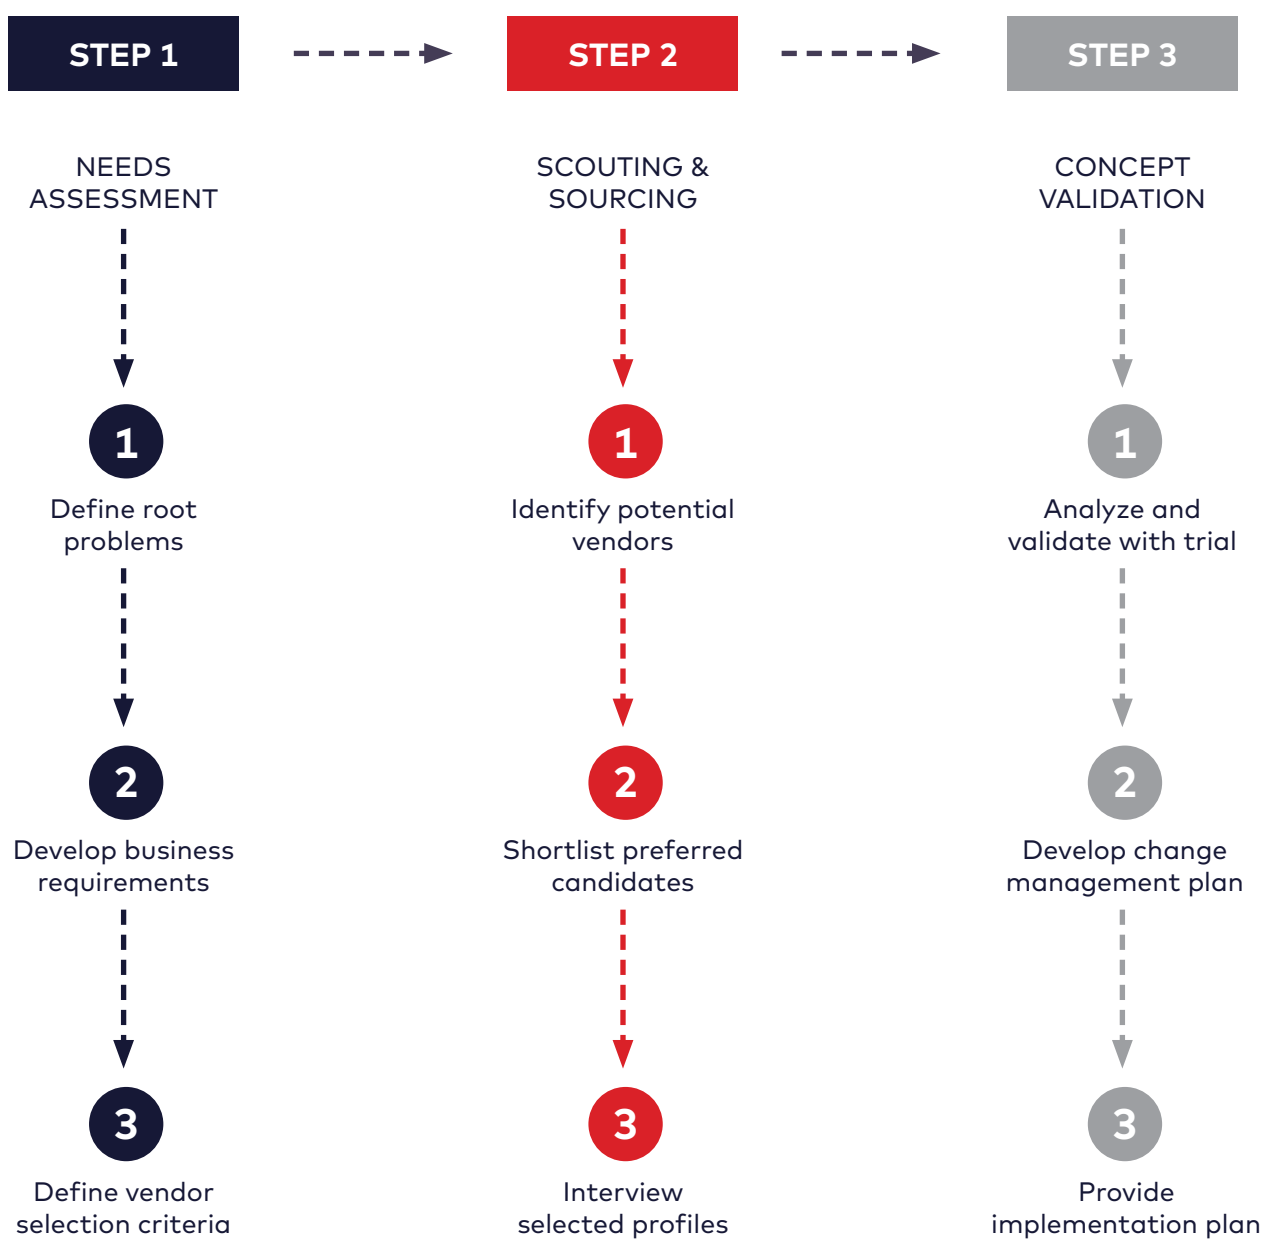

MONTHS

Safety technology pilot projects, in most cases, run over 12 months.

Common challenges to safety technology which slow down or lead to the failure of pilot projects are:

## The **dss+** three-step winning approach

## GET STARTED AT SAFETYTECH.AI

SafetyTech web platform combines dss+ safety technology **know-how** and implementation **expertise**

Speed up technology and vendor selection process

Increase new technology adoption rates by the organization

Minimize technology integration related issues

Surface new insights based on data from new technology

And overall, increase safety and operational KPI's
